

## Field Applied Sash Limiters

All Windsor “Sash Limiters” can meet ASTM F2090-10 Standard Specification for Window Fall Prevention Devices With Emergency Escape (Egress) Release Mechanisms when installed per the supplied instructions.

This sash limiter offering is a FIELD APPLIED option available for all venting window products except Pinnacle Select Pushout Casements.

Sash Limiters are bagged per unit with instructions and installation hardware.

**It is the customer's responsibility to ensure these devices are properly installed per the provided instructions and meet all required codes.**

Windsor “Vent Latches” are for restricting the sash opening only for venting purposes and will NOT meet ASTM F2090-10 requirements. Sash Limiters cannot be used in conjunction with Vent Latches (where available).
